

This project is designed to develop their creativity, physical fitness, communication skills, teamwork, confidence and cultural awareness. Play is a fundamental part of children's development and we bring a big spark of happiness, love, amusement and entertainment into these children's lives and the lives of those who work with them in the camps and orphanages.

Your participation and generous involvement will help spread the joy and ignite the imagination!

You can help by:

- * Financial donation
- * Benefit circus shows
- * Local fundraisers
- * Become a volunteer performer/teacher
- * Donate circus skill toys

THANK YOU! from the entire Spark Circus Team!

SPARK Circus

Run away with the circus!

SPARK! is a group of spectacular international volunteer circus performers who come together to bring joy to groups of disadvantaged children in refugee camps, migrant schools, hospitals and orphanages along the Thai-Burmese border. We reach over 4,000 children each year with our circus-style fire show, playshops and donations of toys, art supplies, and creative tools.

Our goal is to lighten their days with magic and wonder, laughter and smiles.

SPARK! is completely volunteer based, and relies entirely on your generous donations and community support. Your contribution will help provide the spark of life for these children in Thailand! Your donations will go towards school/art supplies, toys and other essentials that the children need. Every dollar helps!

As a donor company or organization, your generosity will be acknowledged in all our media. Both individual private donors and public companies will receive photos and email updates from our performers as the project is happening. You will have the opportunity to see exactly how dramatically your donation has helped brighten their world.

Your donation will help us light the SPARK!

Over 200,000 refugees line the borders of Thailand and Burma, held in refugee camps that can barely manage to provide for basic necessities. Tens of thousands of these refugees are children - children who have been traumatized by the ongoing war waged by the Burmese military dictatorship against the regions hill-tribes. Here they end up in the camps or living illegally along the border regions, at huge risk of being taken into the sex trade, suffering malnourishment and other ongoing threats to their well being and lives. In addition to basic necessities like shelter, clothes, food and education, children also need hope, joy and play.
